Children and Youth Mental Health Survey

OCTOBER 31, 2017
Contents

03 Introduction

05 General population

09 Parents (kids <25 years old)

15 Youth 18-24 and 25-34
INTRODUCTION

• Methodology
Methodology

• An online survey was conducted on Ipsos’ Omnibus among a representative sample of 806 Ontarians, 18 years and older, between October 24 and 26, 2017. The credibility interval for the total sample is ± 4.0 percentage points, 95% of the time.*
• Data were weighted to the 2016 Statistics Canada Census proportions by age, gender and region.
• Analysis includes subgroups of parents with children under 25 years old (n=289), and 18 to 34 year olds (n=210). We surveyed 18 to 24 year olds (n=74) about their current experiences, and 25 to 34 years old (n=136) about their youth experiences. The credibility interval for the sample of parents is ± 6.6 percentage points, and for 18 to 34 years olds ± 7.7 percentage points, 95% of the time.

Reporting conventions:

• We ran statistical significance testing using a t-test applied across subgroups. The test was done at a confidence level of 95%. Sub-groups are only shown in the report where there are statistical differences, and in cases where there is a reliable sample size.
• ▲▼ Red and green arrows are used throughout the report to indicate significant differences between subgroups.

* The precision of Ipsos online surveys is measured using a credibility interval. This is similar to standard confidence limits assigned to traditional phone and other surveys, but has been tailored for online surveys.
GENERAL POPULATION

- Level of priority for children and mental health
- Impact statements on level of priority
- Confidence in system
PRIORITY ISSUES

Children and youth mental health is seen as a lower priority relative to other health system issues.

Q1. THE FOLLOWING IS A LIST OF ISSUES FACING THE PROVINCIAL HEALTH CARE SYSTEM. WHICH TWO ISSUES DO YOU THINK ARE MOST CRITICAL FOR THE ONTARIO GOVERNMENT TO BE FOCUSING ITS EFFORTS?

BASE: ALL RESPONDENTS, REP SAMPLE OF ONTARIANS (N=8 06); 18-24 YEARS -- *SMALL BASE (N=74)

**Indicates a significant difference between subgroups**

18-24*: 48%  
25-34: 33%  
35-54: 28%  
55+: 16%  
Parents with kids <18: 40%  

Regional differences: higher proportion of GTA 905 who select mental health for children/youth (36%, significantly higher than Southwest 22%)
There was a 67% increase in hospital emergency room visits for children and youth in a mental health crisis in the last five years.

Investments in children and youth mental health treatments in the community will not only save lives, but ultimately save taxpayers hundreds of millions of dollars too.

Children and youth can wait up to 2 years for community mental health therapy and treatment programs and some don't receive treatment at all.

▲▼ Indicates a significant difference between subgroups
PARENTS (KIDS <25)

- Child experienced anxiety
- Impacted by child’s anxiety
- Resources
- Seeking help for child
- Ease in accessing resources
Half of parents report having ever had concerns about their child’s level of anxiety.

Symptoms of anxiety can include:
- Excessive fear or worry;
- Panic or anxious thoughts;
- Irritability, sadness or aggression;
- Nausea, sleep problems or difficulty performing daily tasks;
- Avoidance of stressful situations (like school, sports and parties)—among other things.

50% Ever had concerns about child’s anxiety

Q6. NOW, A COUPLE OF QUESTIONS ABOUT ANXIETY. FOR THE PURPOSES OF THIS SURVEY WE’RE REFERRING TO “ANXIETY” AS:...HAVE YOU EVER [INSERT ITEM]?

PARENTS – IMPACTED BY CHILD’S ANXIETY

One-third of parents have had a child miss school due to anxiety; one-quarter have missed work to care for their child. This is significantly higher among parent who have had concerns about their child’s anxiety.

Had concerns about child’s anxiety (n=133):

- **44%** 79% ▲ 67% of parents in Southwest had concerns about their child’s level of anxiety, significantly higher compared to GTA (45%).
- **42%** 73% ▲ Directionally, higher level of Southwest parents talked to a health professional about child’s level of anxiety (49%, total parents is 37%); and directionally higher, Southwest parents say their son/daughter ever missed school due to issues related to anxiety (43%, total parents 33%).
- **37%** 69% ▲ Directionally higher, Southwest parents sought mental health services for their child(ren) (46% vs. 36% total).
- **33%** 63% ▲
- **25%** 46% ▲

**Q6. HAVE YOU EVER [INSERT ITEM]?
BASE: PARENTS OF CHILDREN AND YOUTH (UNDER 25) (N=263).**
Most parents would turn to their doctor first for help; 3% would go to a mental health community agency.

Q7. WHERE WOULD YOU GO FIRST TO SEEK HELP IF YOUR SON/DAUGHTER WERE TO EXPERIENCE MILD TO MODERATE MENTAL HEALTH ISSUE?

FAMILY DOCTOR: 72%
A PSYCHOLOGIST OR THERAPIST: 5%
CHILD AND YOUTH MENTAL HEALTH COMMUNITY AGENCY: 3%
SCHOOL COUNSELLOR: 3%
HOSPITAL: 2%
DON’T KNOW: 4%
NOT APPLICABLE: 3%

© 2017 Ipsos
PARENTS – SEEKING HELP

One-third of parents have sought help for their child; of those who did, 4 in 10 didn’t get the help needed or are still waiting.

- 36% of parents sought help for their child.
- Of those who sought help, 67% had concerns about their child’s anxiety.
- 60% of parents who sought help got the help they needed.
- 20% didn’t get the help they needed.
- 20% are still waiting for help they need.

No difference in these proportions among those who had concerns about child’s anxiety.

Q8. HAVE YOU EVER SOUGHT MENTAL HEALTH SERVICES FOR YOUR SON/DAUGHTER?

© 2017 Ipsos
**PARENTS – EASE IN ACCESSING SERVICES**

Half of parents who sought help said they faced challenges in getting the services they needed, primarily due to wait times.

Q9. HOW EASY OR CHALLENGING WAS YOUR EXPERIENCE/HAS YOUR EXPERIENCE BEEN IN GETTING MENTAL HEALTH SERVICES FOR YOUR SON/DAUGHTER?

BASE: PARENTS OF CHILDREN AND YOUTH (UNDER 25) WHO SOUGHT SERVICES IN Q8 (N=99).
YOUTH

- Experienced anxiety
- Impacted by anxiety
- Resources
- Seeking help
- Ease in accessing resources
Six in 10 youth report having ever had concerns about their level of anxiety.

Symptoms of anxiety can include:
- excessive fear or worry;
- panic or anxious thoughts;
- irritability, sadness or aggression;
- nausea, sleep problems or difficulty performing daily tasks;
- avoidance of stressful situations (like school, sports and parties)—among other things.

Ever had concerns about anxiety
62%
Almost half of youth have missed school due to anxiety, but only 3 in 10 have talked to an HCP.
Compares to parents, youth would turn first to their support network of family/friends for help, and second to their doctor.

Q12A. WHERE WOULD YOU GO FIRST TO SEEK HELP IF YOU WERE TO EXPERIENCE A MENTAL HEALTH ISSUE SUCH AS ANXIETY? Q12B. WHERE WOULD YOU HAVE GONE FIRST TO SEEK HELP IF YOU WERE TO EXPERIENCE A MENTAL HEALTH ISSUE SUCH AS ANXIETY?

Base: Youth 18-24 (N=74); 25 to 34 (N=136)
YOUTH – SEEKING HELP

4 in 10 youth have sought mental health services. More than half of these were not able to get the help they needed.

Have not sought help 60%

Yes, sought help 40%

Had concerns about anxiety (n=128):

- 51%

Of the 40% who sought help:
- 58% got the help they needed
- 42% didn’t get the help they needed

13A. HAVE YOU EVER SOUGHT MENTAL HEALTH SERVICES FOR YOURSELF? 13B. STILL THINKING BACK TO WHEN YOU WERE YOUNGER, DID YOU EVER SEEK MENTAL HEALTH SERVICES FOR YOURSELF?

BASE: 18 TO 34 (N=210)

© 2017 Ipsos
YOUTH – EASE IN ACCESSING SERVICES

Half of young Ontarians who sought help found their experiences in getting services challenging, due to various reasons.

Q14: HOW EASY OR CHALLENGING WAS YOUR EXPERIENCE/HAS YOUR EXPERIENCE BEEN IN GETTING MENTAL HEALTH SERVICES?

BASE: ALL WHO SAID THEY SOUGHT SERVICES IN Q13A OR B (N=89)

<table>
